Scott Farm Seed Company

CLOVERS • ALFALFA • TIMOTHY
GRASSES • SEED CORN • SOY BEANS

Mechanicsburg, Ohio

Dear Scott Friend:

It's the first week of December again and we're trying to get information and prices to you on Farm Seeds ahead of the Christmas mail rush. Many will be interested in ordering part of their seed requirements before the New Year or before an advance might occur in prices.

Seed supplies are rather spotted. There are good crops of Medium Red Clover, Mammoth, Sweet, Ladino, Timothy and Brome Grass and prices are below those of last season. Alfalfa, especially Central and Northern origins, Alsike, Lespedeza and a few others are not as plentiful as last year and quotations are slightly higher.

Southern types of Alfalfa as Arizona, California and New Mexico will be offered by many as supplies are large and prices much lower than on the hardier origins. For green manure or plow under purposes these are excellent as they grow fast during the summer and produce a lot of material for soil improvement. However, under medium to severe winter conditions they are subject to winter killing and there is risk of complete loss if southern origins are used for meadow or pasture purposes. As most alfalfa is used in mixtures at a rather low acre rate, the small additional cost per acre of the hardier seed seems like good insurance.

Which variety of Oats is best? Clinton 59 and Clinton 11, equally good varieties, remain the most popular and are most widely used. Ajax and Shelby are slightly later, taller, not quite as stiff strawed and adapted to more northern areas. Andrew and Columbia are earlier, high in test weight, not as stiff strawed but better suited to southern oats growing sections. Other than the difference in maturity there is little to recommend one variety over the other. All Seed Oats and Barley offered by SCOTTS is treated ready to sow.

The many customers of Scotts Farm Seeds will find this year's seeds fully as good and some even better than in the past. Again you will find they are cleaner and higher quality than can generally be obtained elsewhere.

Those ordering for the first time will be surprised that there is so much difference in seeds. In the 1948 Agriculture Year Book E. A. Hollowell writes: "The most important single thing to do to get a good stand is to buy good seed and give it a chance to grow." Clean, high quality seeds give more satisfactory stands, higher yields and more freedom from troublesome weeds. You, too, are interested in good crops and clean farming.

Sincerely,

THE SCOTT FARM SEED COMPANY.

Freight paid on all shipments of 200 pounds or over

Seed Price List

December 4, 1950

"SCOTTS" grade is the highest quality seed available. It is carefully selected and thoroughly recleaned. Noxious weed free. May contain 0.10% to 0.25% other crop seed and in most cases will test 99.75% pure seed.

MECHANICSBURG
OHIO

SPECIALS: The grades marked "Special" may be slightly off in appearance, lower in germination, or contain a small amount of other clovers or crop seed. This seed is clean and perfectly safe to sow.

MEADOW MIXTURES

Seed 14-16 lbs. per acre

For High Lime Soils

SCOTTS Alfalfa Mixture	\$42.50 cwt.
Alfalfa 6 lbs., Red Clover 4 lbs., Timothy 5 lbs.	
(With 3½ lbs. Ladino per cwt.)	\$47.50

For Medium Lime Soils

SCOTTS Red Clover Mixt.	\$38.50 cwt.
Red 6 lbs., Alfalfa 2 lbs., Alsike 2 lbs., Timothy 5 lbs.	

Where Soil Is Acid or Drainage Is Poor	
SCOTTS Red Clover Alsike	\$35 cwt.
Red 6 lbs., Alsike 2 lbs., M. Fescue 2 lbs., Timothy 5 lbs.	

GREEN MANURE MIXTURE

..... \$30.00 cwt.
A sure catch legume mixture for soil building and plow under. May also be used for pasture or hay. Contains Mammoth, Sweet Clover and Alsike. Sow 10-12 lbs. per acre.

SCOTTS CROP-LAND PASTURE MIXTURE

..... \$60.00 cwt.
Contains Ladino, Alsike, Birdsfoot Trefoil, Kentucky Bluegrass, Ky. 31, Fescue, Reed Canary Grass, Brome Grass, Orchard Grass, Perennial Ryegrass and Redtop. Sow 25-30 lbs. per acre.
SCOTTS crop-Land Mix is suggested where the field is to be left in pasture for at least 5 years and where heavy grazing is desired. Apply fertilizer, and lime where needed, and follow recommended seeding methods.

SCOTTS Spring Pasture Mixture
	\$39.50 cwt.

A balanced, widely used mixture of legumes and grasses containing ladino clover for establishing highly productive permanent pastures. Contains alfalfa, red clover, alsike, ladino, white dutch, Kentucky bluegrass, meadow fescue, timothy, orchard grass and ryegrass.

SPECIAL PASTURE MIXTURE
	\$27.50 cwt.

A good mixture where lespedeza can be grown successfully. Over forty percent legumes by weight. Contains alsike, white clover, lespedeza, ryegrass, meadow fescue, timothy and orchard grass.

Pasture mixtures are sown 20 to 25 lbs. per acre for new seedings and 10 to 15 lbs. per acre for reseeding an established pasture.

TIMOTHY

SCOTTS Timothy\$7.50 bu.
Special Timothy 6.90 bu.

SMOOTH BROME

Certified (limited supply)	\$40.00 cwt.
Southern Type 31.00 cwt.
Northern Type 25.00 cwt.

PASTURE GRASSES

Certified Ky. 31 Fescue\$.80 lb.	Ryegrass (annual)\$.15 lb.
Ky. 31 Fescue Purity 98%	.. .70 lb.	Ky. Bluegrass (fancy)75 lb.

Scotts HYBRID SEED CORN

SCOTTS Hybrid Corn has been graded for width, length and thickness and will plant easily and accurately in any make of planter. It is treated for protection against disease. The round kernels are graded uniformly and will yield just as well as the flats but special plates are usually required for accurate planting. These plates are available for most standard planters. Ohio Certified and Experimental Hybrids not listed are available upon inquiry.

EARLY MATURING HYBRIDS

	Round Grade	Flat Grade
SCOTTS 11	\$8.00 bu.	\$10.00 bu.
Ohio M-15	7.50 bu.	9.50 bu.

Silage Blends, flat kernels (early or late)\$6.50 bu.
Open Pollinated Varieties: Early Butler 6.50 bu.

Round Grade—Supplied in Medium Rounds
Blue Clarage\$7.50 bu. Woodburn\$6.50 bu.

SCOTTS 11—Slightly earlier than Ohio M-15. Large ears for an early hybrid. Has out-yielded Ohio M-15. Sound dark yellow ears. Suited to short season or late planting.

SCOTTS 33—Maturity of K Hybrids. A real producer with disease and smut resistance. Easy husking, nice fodder, not as tall as K-24. Will pick clean and crib early.

SCOTTS 75—Slightly earlier and not quite as tall as most of the C Hybrids, blight resistant, sturdy stalks, large dark yellow ears, bred for handy size and high yields.

SCOTTS 22—The maturity of Ohio M-20 and M-34. Has outproduced its maturity class on many different farms. Good roots, sound ears, dries out quickly.

SCOTTS 66—One of the best medium early maturing hybrids in the corn belt. Disease resistant, husks easily, strong roots, high yields on a wide variety of soils.

SCOTTS 99—Maturity of U. S. 13 and bred for more corn borer resistance and higher yield. Dark green color. Not quite as tall as U. S. 13. Good sized, sound ears.

Soybeans quoted in January—Will have Hawkeye, Lincoln, Monroe, other varieties for bean, hay production
